

DECODING TOMORROW

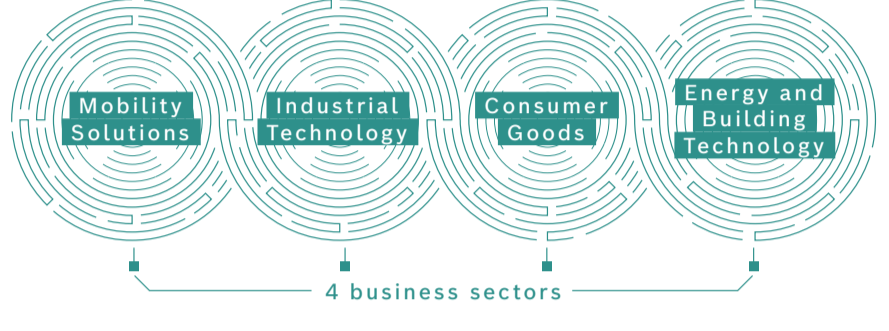

Bosch today
Facts and figures 2022

Our ultimate aim is to develop technologies that make life simpler and better. At Bosch, we sum this up in three simple words: "Invented for life." With our focus firmly on society and the environment, we develop solutions that give people the key to tomorrow's world: products that spark enthusiasm, that simplify everyday life, and that conserve natural resources. In this endeavor, we rely on a thirst for knowledge, expertise in key technologies, and excellence in the development of hardware, software, and services. We call this "decoding tomorrow" – and the following facts and figures show that this is no empty phrase.

THE BOSCH GROUP

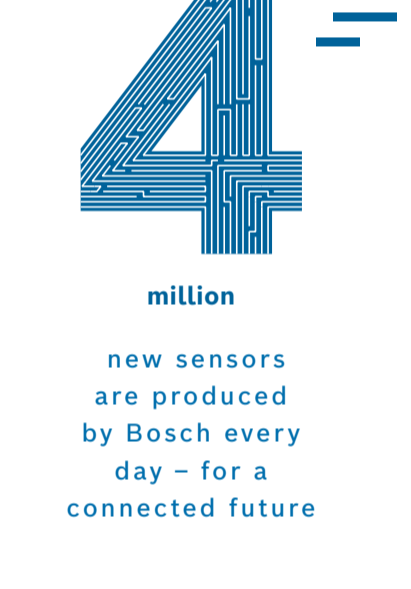

The Bosch Group is a leading global supplier of technology and services. Its operations are divided into four business sectors. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility.

The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in some 60 countries.

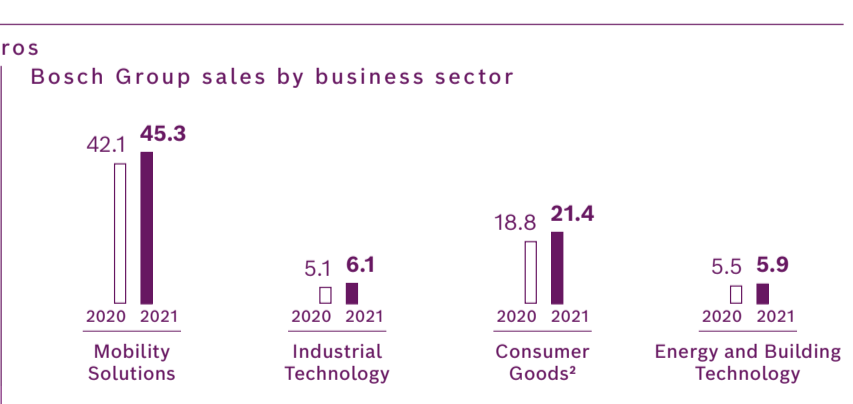

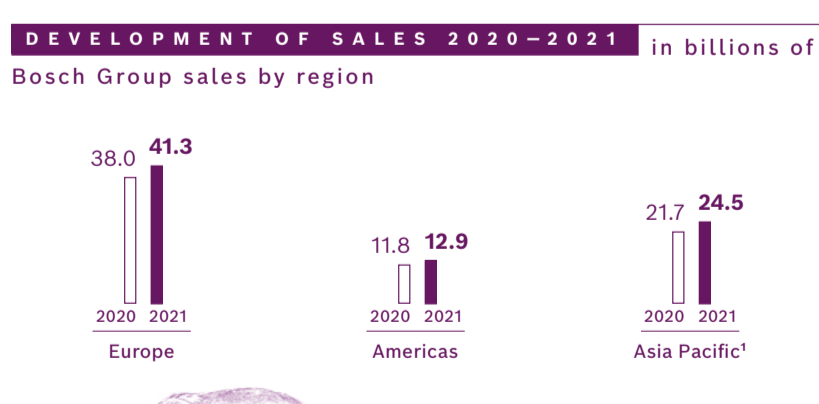

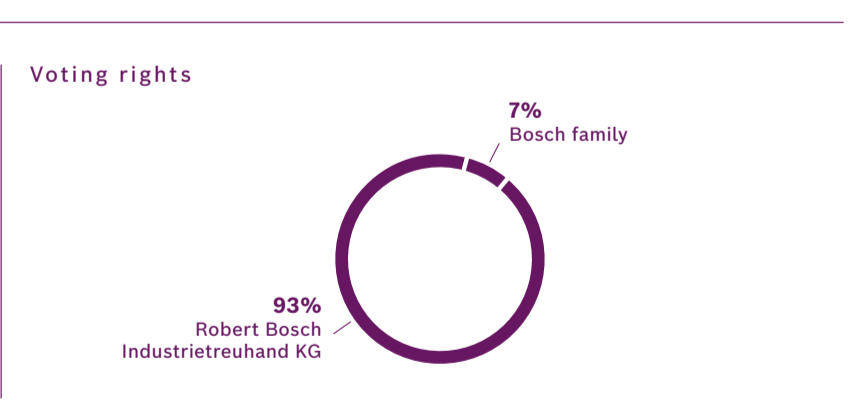

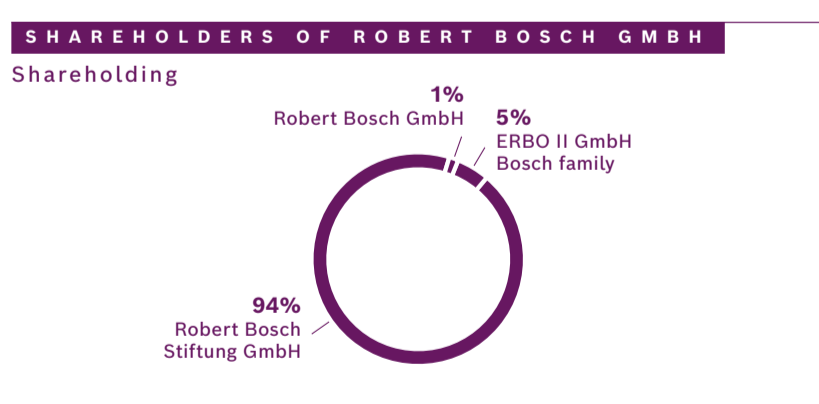

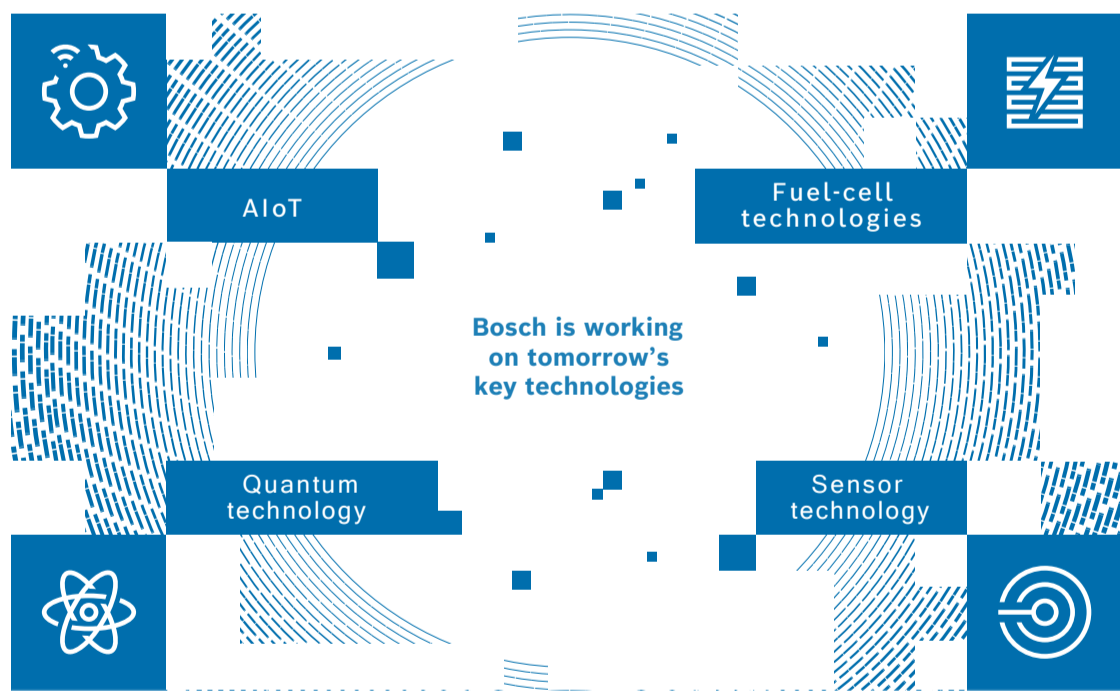

We are working on products and solutions that either contain artificial intelligence or have been developed or manufactured with its help.

First Bosch AIoT factory in Dresden, Germany

AIoT stands for the combination of artificial intelligence and the internet of things. At the Dresden plant, inaugurated in 2021, semiconductors are manufactured completely automatically. Every second, production data equivalent to 500 pages of text is generated. That is the equivalent of 42 million pages a day. This data is evaluated using methods of artificial intelligence.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The remaining shares are held by Robert Bosch GmbH and by a corporation owned by the Bosch family. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust.
